

HYBRID SUBSTITUTE TEACHER SKILLS PROGRAM

Audience: Substitute Teachers

Hours: 150 Hours includes a project

Substitute teachers train for Flexible Schools through this program with an emphasis in pedagogy and education technology including curriculum development, special needs, making and editing videos, managing online lessons, discovering online collaboration strategies, and creating formative and summative assessments for grading online.

Participants are introduced to flipped, hybrid and blended learning models, considerations for online safety, student engagement and classroom management as well as video conferencing etiquette and boundaries.

Upon successful completion of this program, participants should have an increased confidence in being able to **provide educational technology support services for students and teaching staff** that could include:

- ✓ Using visuals in learning
- ✓ Accommodating students with special needs
- ✓ Implementing a flexible lesson that can be taught online, or in the classroom, or both.
- ✓ Setting up an LMS such as Google Classroom
- ✓ Adding tasks and activities into an LMS
- ✓ Creating quizzes and assignments in an LMS
- ✓ Using video conferencing
- ✓ Managing student behavior
- ✓ Sharing and managing teaching videos
- ✓ Entering grades in an online gradebook
