

6 CEUs - ONLINE TEACHING SKILLS PROGRAM

Audience: Licensed Teachers

Hours: 60 Hours includes a project

Teachers prepare for Flexible Schools through this educational technology skill-focused program that includes training in making and editing videos, managing online lessons, finding technology tools related to a particular subject area and grade level, and creating assessments that are aligned to standards for grading online.

Participants learn to design curriculum for flipped, hybrid and blended learning models and can create lessons that can be taught online, face-to-face or both. Teachers are introduced to considerations for online safety and classroom management as well as video conferencing etiquette and boundaries.

Upon successful completion of this program, participants receive 6 CEUs from Ashland University, a regionally accredited university, and should have an increased confidence in being able to meet the needs of learners regardless of their location and that could include:

- ✓ Setting up an LMS such as Google Classroom
- ✓ Planning a flexible lesson that can be taught online, or in the classroom, or both
- ✓ Creating rubrics and assessments for online learning
- ✓ Using video conferencing effectively
- ✓ Sharing and managing teaching videos
- ✓ Adding tasks and activities, quizzes and assignments into an LMS

Convenient access anytime, anywhere, any device

Implement practical resources and tools

Demonstrate comprehension with quizzes and checks for understanding
